

200lt Drum Heating Performance

TECAM Srl is a company that has been operating for years in the heating sector of drums and tanks, in particular produces several products suitable for heating 200-liter drums. The choice of the correct equipment in this field depends on several factors, including the type of product used, the specific temperature required in the machining process and the heating levels you want to achieve.

The silicone band ref. FS0200130 has a power of 1500W and an adjustable thermostat from 0 to 130 °C.

It is often used in pairs on a stem to heat more evenly, and have high performance.
